together we make
processes
work

Dear Partner,

Since MAC Equipment was founded in 1969, we have been the company that brings experience and technology together to create pneumatic conveying, injection and filtration solutions. We have brought innovation to life through inspiration and collaboration with our customers. At MAC Equipment, these values show in what we do every day and guide our development as we move forward as a company.

In February 2011, we were acquired by the Schenck Process Group, a manufacturer of best-in-class process solutions for customer's weighing, feeding, screening and automation needs. As part of the Schenck Process Group, we are able to offer you more process solutions with an expanded product line, enhancing our ability to provide an even greater range of solutions for our customers. Our expanded network of over 2,600 employees in locations world-wide is capable of delivering solutions to customers internationally.

Furthermore, our name changed to "Mac Process Inc." on May 5, 2011, better representing the process knowledge we provide. Customer care and commitment is central to the Schenck Process Group companies. As a member of the Schenck Process Group, we can now develop our process solutions with greater breadth and efficiency with our core objective being the creation of long lasting, satisfied customers. Working jointly with Schenck AccuRate and other Schenck Process companies, both here in the United States and internationally, will enhance our ability to provide an even greater range of solutions for our customers.

Our name is different, but what hasn't changed is our dedication to our customers and business partners. We are growing together and look forward to providing you with the same high level of service, support, and dedication you've come to expect. As a new member of the

we make processes work

Schenck Process Group, we assure you of our continued commitment to deliver customer-focused solutions, market-leading technology, and demonstrated benefits and savings—all complemented by deep industry expertise. This is an exciting time for us to be “one” under the Schenck Process Group. Our customers and business partners are also now part of the “one” family.

I would like to thank you for supporting this new era in Mac Process’s long and proud history. For U.S.-based customers, all your existing MAC and Schenck AccuRate contact partners remain unchanged, so please do not hesitate to contact them for further information or to discuss your material handling needs.

Let’s look to the future together.

Yours sincerely,

Jay Brown
CEO
Mac Process Inc.

Schenck Process Group is organized along International Business Segments, namely:

Heavy: Cement, Gypsum, Sand & Gravel, Steel and NF Metals industries

Light: Chemicals, Food, Pharmaceuticals and Plastics industries
